Background

Good Distribution Practice (GDP) is the sum of measures taken within the distribution chain to ensure that the quality and integrity of medicinal products and active pharmaceutical ingredients (APIs) are maintained. The requirements within the scope of drug distribution have increased continuously. This affects not only all service providers involved in the drug supply chain, such as storage, transport and distribution companies and wholesalers, but drug and API manufacturers, as well. All parties involved must receive regular training. A lot has happened in the GDP environment in recent months. In order to get an overview, this webinar was developed.

Educational Objectives

This webinar aims to give a comprehensive yet compact overview of current requirements and latest developments in GDP – those already realized and those planned:

- News from the world of GDP – Regulatory changes, guidelines and publications from authorities and organizations during the last 12 months
- News from the European GDP Association
- GDP Compliance – Overview of requirements, responsibilities and necessary documents/SOPs
- The GDP Non-Compliance Reports of 2024 – Findings and possible prevention
- Interesting cases from GDP inspections – Hazards and how to avoid them
- Outlook for 2025

Target Audience

This webinar addresses itself to all, which are involved in the range of the distribution of medicinal products for human use, active substances or veterinary medicinal products.

Those are e.g. coworkers and high-level personnel from the following industries:

- Drug wholesaler,
- Logistics companies,
- Pharmaceutical manufacturers
- API manufacturers
- External warehouses,
- Further service providers offering services for the distribution of pharmaceuticals
