**Facing the GMP- GVP Interface:
the Role of the QP and the QPPV**

Objectives

During this Live Online Training, you will learn all relevant aspects to efficiently organise and improve your Complaint Handling and Recall System to **fulfil current GMP requirements and to get the best benefit for your daily business.**

Background

In principle, every complaint might cause a recall, and every complaint may provide an opportunity to improve.

According to the **EU-GMP Guide Chapter 8**, the pharmaceutical industry **must review all complaints** and other information concerning potentially defective products carefully according to written procedures. In order to provide for all contingencies, a system should be designed to investigate the need to **recall, if necessary, promptly and effectively products** known or suspected to be adulterated from the market-place.

According to the EU- GMP Guide, a person should be designated responsible for handling the complaints and deciding the measures to be taken. The **Qualified Person (QP)** together with the **Qualified Person for Pharmacovigilance (QPPV)** should be made aware of any complaint, and be actively involved in the investigation and any subsequent recall.

The handling of technical complaints (also called non-medical complaints) triggers high demands on the process organisation and quality system. However, these complaints are also a chance for **continuous improvement** and to prevent the reoccurrence of future failures.

Reviewing **FDA's Warning Letters** of the last fiscal years reveals that Complaint Handling processes are a hot topic. Recent media coverage of recalls due to non-GMP operations and counterfeit products entering the supply chain are also an indication of how important it is to treat all complaints with the highest priority. The main failures can be found in the overall process and in inadequate investigations, as the following excerpts show:

- "Your firm failed to follow procedures for the handling of all written and oral complaints"
- "The inadequacy of your firm's quality oversight is demonstrated by the failure to perform thorough investigations of product failures and complaints."
- "The QCU failed to ensure customer complaints were adequately investigated"
- "Your firm failed to review and approve complaints"

Target Audience

This Live Online Training is designed for all personnel involved in complaint handling and/ or recall activities at their company and all responsible persons like the Qualified Person / the Qualified Person for Pharmacovigilance (QPPV) and decision makers who want to improve the existing process.

Programme Day 2

Recall Session

The Handling of Recalls

- Implementation in the system
- The recall process
- Flow of information
- Documentation

How to perform a Mock-Recall

Both FDA and EU GMPs call for regular evaluations of the effectiveness of the recall processes. This session will show you, how such an effectiveness check could be performed.

A practical View: Access to the Root Cause

When to Recall or not to Recall – Apply Root Cause Analysis

A hypothetical scenario will be shown: What action needs to be taken, what information is needed, who should be involved, and ultimately - Is a recall required and if so to what level?

Q & A Session 3

Your Benefit

Internationally Acknowledged Certificate from ECA Academy

The EU GMP Guide requires: „... All personnel should be aware of the principles of Good Manufacturing Practice that affect them and receive initial and continuing training, ...“
This is why you receive an acknowledged participant certificate, which lists the contents of the Live Online Training in detail and with which you document your training.
