

FDA and EU: Assessment - Practical Aspects - Statistical Background

15-16 October 2015, Berlin, Germany

SPEAKERS:

Dr Christopher Burgess Burgess Analytical Consultancy, UK

Klaus Eichmüller EU Inspector, Germany

Gert Moelgaard NNE Pharmaplan, Denmark

Dr Thomas Schneppe Bayer Pharma AG, Germany

PROGRAMME:

- EU and FDA View
- Practical Aspects of DoE
- Process Validation Life Cycle How to Implement
- Statistical Background

New programme title (formely "The New FDA/EU Approach to Process Validation") and updated content

Process Validation in the light of the revised Annex 15 and FDA Requirements

15-16 October 2015, Berlin, Germany

Objectives

With publication of the Guidance for Industry "Process Validation: General Principles and Practices" 2011, the FDA requires a new direction. Validation is now a "Life Cycle Process" with 3 stages:

- Process Design
- Process Qualification
- Continued Process Verification

The focus is on process knowledge and process understanding. Both should be a result of development and verified in routine production. The "magic" 3 batches are not mentioned any more. What is very important nowadays is the term "scientific sound", and explicit statistics are mentioned. Six Sigma elements (e.g. Design of Experiments, DoE) are also mentioned directly or indirectly. There will be a new stage in routine production called "continued process verification".

With the revision of Annex 15 EU GMP Guide the EU is going in the same direction: Validation is a lifecycle with pharmaceutical development als basis and also a stage 3 is mentioned, called Ongoing Process Verification. In Europe 3 validation approaches are now possible – traditional, continuous and hybrid.

- How can the new requirements be achieved?
- How fit the FDA requirements into European guidelines and vice versa?, How can process knowledge and process understanding be demonstrated on the basis of development studies?
- When is a process valid now?
- Which parameters can be used for knowledge and understanding studies?
- How can "continued/ongoing process verification" be realised?
- How can statistics help?

These questions are discussed, and the possibilities for implementation are covered.

Background

Since 1987 the FDA Guideline on Process Validation has been the basis for qualification and validation. Within the new FDA programme "Pharmaceutical cGMPs for the 21st Century" there was an announcement for a revision of the guideline. A new FDA Policy Guide of 2004 gives some hints to the new validation approach. In November 2008 the new "Guidance for Industry Process Validation: General Principles and Practices" was published as a draft and came into operation in January 2011. That is now FDA's "current thinking". Chapter 1 of the EU GMP Guide gives hints for more emphasises on process capabilities and varieties within process validation also in Europe. EMA's Process Validation Guidance and also the revised Annex 15 which come into force on 1 October 2015 takes a life cycle approach to process validation.

Target Group

The addressees of the event are qualified staff charged with or responsible for validation activities, such as commissioners for validation, heads of quality assurance, department heads, etc. It also addresses members of validation teams (e.g. engineers, chemists, pharmacists, microbiologists) as well as representatives of the plant engineering industry and consultants.

Note: The number of participants is limited to 36 persons.

Moderator

Dr. Christopher Burgess

Burgess Analytical Consultancy, UK

Programme

FDA Thinking

- How the concept of Process Validation is about to change
- Ongoing changes in the Quality Management philosophy
- Real-life examples

The new EU Approach on Process Validation

- Process validation in EU guidelines
- What is new?
 - Revision of Chapter 1 EU GMP Guide
 - EMA's Guidance Process Validation
 - Annex 15 revision
- The future of process validation

Background and Environment of Process Validation – Industry view

- Process Validation in guidelines history
- The FDA Process Validation Guidance –an overview
- European perspective
 - Annex 15 revision

Case Study Process Validation

- Role of SOP in the company QM System
- How to deal with the established 3 batch approach?
- Key aspects (Preconditions, Stages 1-3, Review)
- Further deliverables from the data and link to other company SOPs

Basics on Statistics

- An overview about statistical aspects
- What statistics do you need for modern Process Validation?

Process Design

- Validation as a lifecycle concept
- Development prerequisites
- Criticality of Process Design
- Process definition and design space

Design of Experiments - Principles of Defining the Design Space

- Why bother to design experiments?
- DoE versus one factor at a time
- Types of design
- Basics of a simple 2x2 factorial design
- Tutorial example of application to a chemical synthesis

Design of Experiments – Application examples of factorial design

- Principles and practice of full 3 factor 2 level design
- Tutorial example of application to a analytical method robustness study
- Supporting Excel spreadsheet.
- Tutorial example of application of a reduced design to a excipient formulation study

Tutorial Workshop DoE

All delegates receive an Excel spreadsheet with the equations and detailed calculations.

Performance Qualification Approach

- Design & qualification of facility, utilities & equipment
- Performance qualification approach
- Performance qualification protocol
- Documenting the quality baseline

PPQ Workshop

The delegates make a statistical evaluation of validation data (e.g. trend analysis, Cpk).

Continued/Ongoing Process Verification

- Process mapping &critical process variables
- Process data collection and collation
- Trend analysis & Statistical Process Control
- Deviation management & CAPA
- Change management
- Management's role in Process Validation

Continued/Ongoing Process Verification Process Verification Workshop

The delegates make a High Level Risk Assessment to analyze where they are going to focus in process verification.

Speakers

Dr Christopher Burgess, Burgess Analytical Consultancy, UK

Dr Burgess is a Chartered Chemist and has more than 36 years experience in the pharmaceutical industry primarily with Glaxo in

Quality Assurance and Analytical R&D. He is a "Qualified Person" and a member of the European QP Association advisory board. He has been appointed to the United States Pharmacopoeia's Council of Experts 2010 to 2015 and is a visiting professor of the University of Strathclyde's School of Pharmacy and Biomedical Sciences (SIPBS). In addition, he is the chairman of the ECA Analytical Quality Control Group and a member of the Executive committee of European Compliance Academy.

Klaus Eichmüller, Regional Council Darmstadt, GMP Inspectorate, Germany After working in the pharmaceutical Industry

Klaus Eichmüller joined the District Government of Upper Bavaria in Munich. Since 1996

he is working in the field of GMP Inspections of manufacturer of medicinal products and importers. He was Deputy Head of the Central Authority for Supervision of Medicinal Products in Bavaria" as long as it existed and is now Head of the Inspectorate for Drug Products, APIs, Blood Products and Tissues in Hesse since March 2014.

Gert Moelgaard, NNE Pharmaplan, Denmark Gert Moelgaard is Vice President for Innovation & Business Development in NNE Pharmaplan. He has been working in the pharmaceutical industry since 1982 and has

experience from a number of major engineering, automation and validation projects within pharmaceutical manufacturing. He has made international contributions in international conferences on automation, process validation, PAT and manufacturing excellence and has contributed to several books and technical guidelines.

Dr Thomas Schneppe, Bayer Pharma AG, Germany

More than 20 years experience in the pharmaceutical industry. Since 2006 Bayer Pharma AG; Head of Mgmt. Training at Bayer

Health Care - Product Supply - Compliance - Integrated Quality Mgmt.

Social Event

On 15 October 2015, you are cordially invited to a social event. This is an excellent opportunity to share your experiences with colleagues from other companies in a relaxed atmosphere.
