## Background

In the pharmaceutical industry, drug dissolution testing is routinely used as a key test parameter for assessing the performance of solid and semi-solid dosage forms in both drug development and quality control. A dissolution test measures the amount of drug that goes into solution over a period of time under standardized conditions. It is used to assure batch-to-batch quality, to provide process control, and to substitute in vivo studies under certain circumstances.

## Educational Objectives

This webinar aims at providing delegates with a sound understanding of the principles and practices in dissolution testing. The following topics will be covered:

- Dissolution technique
- Factors affecting dissolution
- Regulatory requirements (general guidelines, USP, EP)
- Dissolution methods and apparatus
- Dissolution automation
- Qualification of dissolution apparatuses
- Development of dissolution methods

## Target Audience

This webinar targets executives and staff in development and quality control in the pharmaceutical industry. The webinar is also intended for participants from quality assurance, regulatory affairs as well as contract laboratories.

## Speaker

**Dr Gerd Michael Maier**  
**Boehringer Ingelheim Pharma GmbH & Co. KG,**  
**Biberach, Germany**

Dr Gerd-Michael Maier is a chemist by training and did his PhD graduation in bioinorganic chemistry at the University of Konstanz. He joined Boehringer Ingelheim in 1997 where he started in the Drug Regulatory Affairs department and worked as a regulatory affairs manager. After three years as team leader Regulations & Training in the Quality Systems group Gerd-Michael joined the department of Drug Discovery Support in research leading a CMC lab for almost 10 years. Since 2014 he holds the position of a dissolution lab head within the Analytical Development department at Boehringer Ingelheim, Biberach.
